

DOCS

Documentation

- API Documentation
- Guides & Tutorials
- Versioning
- Hosting + Infrastructure

It's difficult 🤔

Reducing friction

- Effortless publication of API docs / Guides
- Guidance to improve documentation
- Something is better than nothing

GitHub Bot

- Create PRs when people don't have a link to their documentation in the README
- Open issues if releases have not been tagged properly
- Raise overall quality of Clojure OSS

Dreamcode

```
curl -X POST \  
https://docs.clj/api/build-docs?project=ring/core&version=1.0.0
```

Documentation rendered at:

<https://docs.clj/ring/core/1.0.0>

Features

- Every release on Clojars automatically triggers a documentation build
- Project's doc/ folder will be incorporated
- All past versions will be kept available
- All information will also be available as data

Want to help?

- I don't know stuff about Docker 🐳
- Help with the API & Github Bot 🤖
- Join the discussion at 
 - <https://clojureverse.org/t/1287>

Thanks 🙌
